From The Dir of P H

No C 232-2 of 16 9 42

Requests sanction to an outright grant of Rs 3500 from out of the W S Grant required for the improvement of water supply to the Davagada town

1) It is stated that there is a bore well in the Shandy maidan with an yielding capacity of 750 gallons of water per hour. It is proposed to effect the following improvements to ensure a more satisfactory supply at a total cost of Rs 3500, which is recommended to be met entirely by Govt out of the W S Grant for the current year in view of the meagre finances of the body.

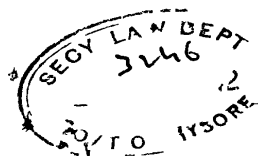

- 1) Repairs to the hand-pump fitted to the present existing bore-well at the place
- 2) Construction of a balancing tank of 400 gallons <sup>capacity</sup>
- 3) installation of 4 rubber tubes instead of <sup>the</sup> ~~one~~ <sup>existing one</sup>
- 4) Sinking of another draw-well in a suitable locality

2) The Concerned Asst Engr has been asked to prepare the estimates for the above. The receipt of the estimate may perhaps be awaited and for orders.

24/9/42

3 In person

A- will be awaited

- I do for orders two estimates for
- (1) Estimate for Rs 1500/- for repairing the existing pump fixed to the bore well, providing an Rect tank storage tank of 400 gallons capacity, and 4 taps
  - (2) Estimate for Rs 1690 for installing a new hand pump at the bore well

13) The D.P. It stated in his previous letter dated 16 9 42 that the Sanitary Engg <sup>was</sup> recommended of opinion that the first mentioned estimate was suitable. Now it is stated that the existing pump is an old type of pump manufactured by the C. I. Workshop which may not work satisfactorily for a long period in spite of repairs at a cost of about Rs 700/- He therefore recommended sanction to the ~~2nd~~ <sup>new</sup> ~~estimated~~ estimate for Rs 1690 for the installation of a new cylinder pump. It has to be pointed out that the 2nd estimate ~~however~~ <sup>however</sup> does not provide for the construction of the tank and the installation of taps provided in the estimate for Rs 1500/- No estimate has been received for sinking another draw well at the place as originally proposed. I do for orders with refce to para 6 of the notes <sup>supra</sup>

Rel. in  
27/11

14) For the present, the estimate for Rs 1500/- for repairing the existing pump providing 400 gallons capacity tank and 4 taps may be sanctioned

# Improvement of water supply at Paravara

the entire expense being met out of the  
water supply grant during the current year  
and the results of this arrangement watched  
for some time

3196  
2

15) The question of installing a  
new hand pump (new rye pump)  
at a cost of Rs 1697 & of sinking another  
well at a cost of Rs 2500 - might  
be considered later on. Further, if these  
questions are taken up now, the relief  
needed to the people in regard to water  
supply in Paravara is likely to be delayed.

16) In order to <sup>be</sup> ~~report~~ to para 6 supra  
Lawrence J. J. J.

17) Instead of repairing the  
old pump at a cost of Rs 700  
a new pump may be purchased  
& fixed. The estimate of Rs  
Rs 1690/- may be sanctioned.

BANGALORE

Dated 15th September 1942

76  
No. 73-42-2

To

The Secretary to Government,

Law Department, Bangalore

Re Improvement of water supply to Pavagada town

with reference to the observation of the Minister for Public Health and Local Self Government, at the Central Health Committee meeting held on 27-3-42 that the present water supply to Pavagada town was very inadequate and that proposals must be submitted for an adequate water supply scheme to the town, I have the honor to state that the Sanitary Engineer inspected the town on 2nd September 1942 and opines that the existing hand pump set fitted up to the borewell in the Shandy Maldan has got repaired and a small balancing tank of about 100 gallons capacity with four taps may be constructed in the neighbourhood, so that instead of one tap, water could be drawn from 4 points in the Shandy Maldan, which would greatly relieve the congestion.

The Sanitary Engineer further reports that the Municipal President and Vice-President wanted a new draw well to be sunk in a suitable locality in the town costing about Rs 2,500 and requested that the cost of this and that of repairing etc of the existing borewell amounting in all to about Rs 3500 may be met by Government as an outright grant as the Municipality is very poor and cannot afford the cost.

The Assistant Engineer, No 1 Sub Division, Tumkur has been asked to prepare estimates for the above for further action in the matter.

A copy of letter No 291 dated 4th September 1942 of the

Sanitary

Letter No 291 dated 4th September 1942 from the Sanitary Engineer, Bureau of Sanitary Engineering, Bangalore, to the Director of Public Health in Mysore, Bangalore

---

Re - Improvement of water supply to Pavagada Town

I have the honour to invite your kind reference to this office No 1769 dated 27th May 1942, wherein I brought to your notice that the Minister for Local Self Government and Public Health has desired that urgent proposals for the improvement of water supply to Pavagada town should be investigated, and proposals submitted

Outside the town and in the shandy maidan there is a borewell rigged up with a hand pump which yields about 750 gallons of water per hour. The Municipal President and the Vice President, who were consulted in the matter of finance, and who accompanied me during my inspection of the town on 2nd September 1942, informed me that the finances of the town are so poor that it will not be possible for them even to meet the A.M. charges on the installation even if the full funds for the water supply scheme should be found by Government. It was definitely suggested to me by the Municipal Vice-President that they could not think of a power driven borewell scheme on account of the above reasons. It was suggested that the following improvements, if done, would meet with the demands of the town -

1 The existing hand pump set fitted up to the borewell in the shandy maidan should immediately be got repaired, and a small balancing tank of about 400 gallons capacity with four taps should be constructed in the neighbourhood, so that instead of one tap, water could be drawn from 4 points in the shandy maidan, which would greatly relieve the situation

2 In addition to the above, the Municipal President and the Vice-President wanted a new draw well to be sunk in a suitable locality in the town costing about Rs. 2,500/- They pray that since the Municipality is very poor and cannot afford

the

-2-

the cost, the entire cost of repairing the borewell plant, provision of a balancing reservoir and taps and sinking of this new well, costing in all about Rs 3,500/-, be met by Government as an outright grant

I have requested the Assistant Engineer, No 1 Sanitary Subdivision, Tumkur, to prepare estimates on the above lines for sanction and the same will be submitted to you in due course

Sir

subject - Improvement of water supply to Iyavada Town

With reference to your letter no L 3351 dated 25th September 1942 and reminder no L 4816/L 73-42 dated 16th November 1942, I have the honour to forward herewith an estimate amounting to Rs 1500/- together with necessary report for repairing the existing pump and providing 400 gallons capacity tank and 4 taps for favour of information and sanction.

In this connection, the sanitary engineer intimates that the existing pump is an old type of pump manufactured long back by the Central Industrial Workshop, and it is likely that ~~the~~ in spite of Rs 700/- spent for repairs, the pump may not work satisfactorily for a long period. A new Meyer's pump is therefore recommended and an estimate for Rs 1690/- for fixing a new pump is also enclosed for orders.

I have the honour to be,
